

Mobile Solutions for Health Accounts

Our mobile tools allow participants to connect on their terms with anywhere, anytime access.

Our secure mobile application, **CYC Mobile**, provides on-the-go access and seamless service.

Features include:

- View account balances and transaction history
- Review claim details
- Submit a new claim
- Pay providers directly with mobile bill pay and Click-to-Pay
- Access HSA investments and contribution center
- View FAQs and eligible expenses
- Receive account alert push notifications
- Tap to call Customer Service

Save time with our quick and easy documentation upload!

- Take a photo with the phone's camera
- Image is submitted in seconds
- No need for faxing or mailing
- Image is saved with claim as a record of submission

"I use the mobile app all the time, it is so simple and easy to use. I love that I can scan my receipts and get reimbursed quickly. This app is much better than any other app that I have used!"

Alexis, mobile app user

Mobile Text Alerts

As a complement to our mobile application, or for users without smart phones, we also offer mobile text alerts.

How Mobile Text Alerts Work

- Quickly and easily register online
- Send text requests for account balance, claim and contribution information
- Receive text messages immediately after any card swipe that requires receipts
- Manage alert settings anytime online

mobile access

24/7

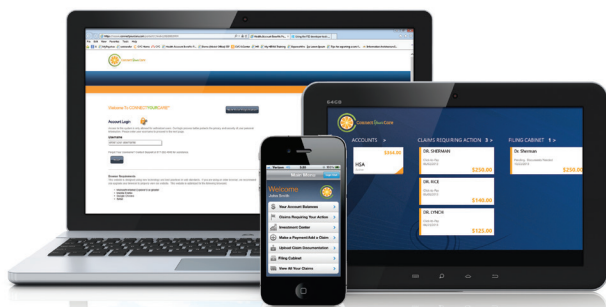

onshore support

online access

Text Commands:

- **BAL** for account balances
- **CONT** for last five contributions
- **CLAIM** for last five claims
- **HELP** for text command instructions
- **STOP** to stop mobile alerts

Our Mobile Tools Boost Participant Satisfaction

Participants love the convenience of our mobile technology – account balances at their fingertips, the ability to submit receipts before they are lost, and expert support that is just a tap away.

Additionally, our account alerts immediately notify participants when a healthcare payment card purchase requires additional documentation, bringing proactive support to the next level.
